

Verisk 3E and SAP – Empowering Smarter Product Compliance

Verisk 3E is SAP’s strategic development partner and exclusive provider of embedded regulatory content for SAP S/4HANA

Ensuring product safety, managing regulatory compliance and promoting responsible design, development and management of products throughout their lifecycle is a difficult job. Lack of access to current, comprehensive product safety and chemical regulatory data when and where you need it makes it nearly impossible.

Verisk 3E™ and SAP® have partnered to deliver the regulatory intelligence and product compliance solutions you need to accelerate the development and launch of safe, compliant products. SAP has chosen Verisk 3E’s global regulatory content to fuel its product compliance platforms, empowering your team to anticipate and manage regulatory changes, respond quickly to changing customer requirements, avoid supply chain disruption and speed time to market.

Only the powerful combination of SAP and Verisk 3E can provide access to comprehensive regulatory insight that can be directly embedded in your product safety and stewardship processes to drive informed, proactive decisions.

ENSURE GLOBAL PRODUCT COMPLIANCE WITH SEAMLESS ACCESS TO VALUE ADDED REGULATORY CONTENT AND EXPERTISE WITHIN SAP

Verisk 3E set the standard for combining regulatory expertise with enriched global compliance content and transforming it into actionable intelligence. Leveraging our content solutions directly in your SAP platform enables your team to enforce compliance at each step of the product lifecycle. You can monitor and manage regulations, utilize up-to-date regulatory content, collect compliance information from customers and suppliers, assess compliance of your products’ parts and raw materials and track registrations and substance volumes.

CHOOSE THE BEST OF BREED FOR YOUR BUSINESS

In April 2019 Verisk 3E acquired SAP’s Content as a Service (CaaS) business along with the ERC (EHS Regulatory Content) and ERD (EHS Regulatory Documentation) teams and solutions. The acquisition and co-development agreement allow two industry leading organizations to optimize their respective portfolios and deliver a best of breed solution for customers.

Verisk 3E has a proven track record of providing SAP customers with the integrated content, solutions and expertise they need to optimize their SAP platform. With the integration of SAP’s ERC and ERD solutions into the Verisk 3E centers of excellence, we have extended our robust SAP portfolio to include an unmatched integrated content solution for the SAP user community.

SAP clients can benefit from this powerful partnership in many ways including:

- Compliance content and solutions researched and updated by the world’s leading team of regulatory experts
- The most current and comprehensive regulatory content available
- A proven solution. Verisk 3E has more experience in integrating EHS regulatory data into SAP than any other company. We have served hundreds of corporations in a wide range of industries for more than 20 years.
- Maximized return on investment and reduced total cost of ownership of your SAP platform as you migrate to S/4HANA®
- Seamless integration with SAP product compliance solutions and native SAP business processes

“Verisk 3E has a long-standing and successful track record of providing SAP EHSM customers with the critical solutions they need to optimize their SAP platform. We’re delighted to be able to build upon our existing relationship to create even greater value for customers through the combined strengths of our organizations and the people developing and supporting them. This move will allow SAP to focus on providing a best-in-class product compliance software solution complemented by Verisk 3E’s comprehensive content offering.”

*Christoph Behrendt
EVP, Industry & Application Innovation, SAP*

Verisk 3E acquired SAP's ERC (EHS Regulatory Content) and ERD (EHS Regulatory Documentation) teams and solutions, securing our position as the exclusive provider of integrated content for SAP product compliance solutions. Verisk 3E content will be embedded in all releases of S/4HANA. We are working in close partnership with SAP to codevelop next generation solutions that empower smarter product compliance.

OPTIMIZE PRODUCT COMPLIANCE PROCESSES

Product Marketability and Chemical Compliance

Ensure compliance of products and chemicals to secure the right to market, sell and ship products in intended markets.

Regulatory Content (3E ERC)

3E ERC™ from Verisk 3E seamlessly integrates into your SAP EHS or SAP S/4HANA system. You can automate compliance assessment, product classification and Safety Data Sheet (SDS) creation and ensure hazardous materials are properly labeled and packaged for safe transport.

- Leverage comprehensive up-to-date regulatory content including substance lists and reference data covering product safety, marketability and dangerous goods requirements for SDS and label authoring.
- Streamline and automate authoring with sophisticated rules, multilingual phrases and SDS templates.

Regulatory Documentation (3E ERD)

3E ERD™ from Verisk 3E is a proven solution for managing component data and authoring SDSs for 140+ countries. Because the solution can natively integrate with SAP Business Suite applications, you can connect your SDS authoring processes with relevant sales, manufacturing and logistics processes for an integrated, proactive, cost-effective approach to compliance.

Notifications & Registrations

Leverage Verisk 3E's global team of regulatory experts for support of notification, registration and recurrent reporting for chemical products and substances including EU Poison Centre Notification (PCN). Our 3E Notify™ for Poison Centres – SAP cloud-based notification engine plugs in to your SAP EHS or S/4HANA for product compliance platform, automating UFI generation, dossier compilation and notification submission. Our PCN experts can also provide services ranging from data obtainment to end-to-end notification generation and submission.

Raw Material & Supplier Information

Rely on Verisk 3E to collect vendor SDSs and supplier data to support SDS authoring and notification activities. Our team will deliver vendor SDSs along with a full set of product and/or substance (component) data into SAP EHS and S/4HANA for product compliance.

Single Source Compliance Support

Leverage Verisk 3E's full suite of intelligent compliance solutions including SDS and chemical management, chemical and cosmetics reference, regulatory monitoring, supply chain stewardship, facility EHS and emergency response services, regulatory consulting and more.
